

21 April 2014

Fellow Military Professional,

As a uniformed military professional you understand the importance of implementing training to ensure your staff is well prepared to execute your mission, vision, and strategic goals. This is especially important considering your vital role in Americas Homeland Defense mission by responding to a CBRNE event in support of Civil Authority.

As a former WMD CST Commander and Joint Director of Military Support to Civil Authority (J2 and J3), I work with our IIF team to meet your continuing professional development and educational requirements. Our team can help you maintain current knowledge on CBRNE events by providing the highest level of educational training classes, courses, lessons learned and table-top exercises through our diverse course menu.

Our IIF staff will provide you MTTs comprised of staff that are former team members who have promulgated programs, policies, TEOs, External Evaluations and National-Level Exercises for the WMD CST, CERFP and HRF teams in accordance with regulatory standards. In addition, we can obtain continuing educational units (CEUs) when requested.

Founded in 1998, IIF provides professional, responsive, experience-based, all-hazards emergency management and domestic operations support services. The services include training, exercise development and execution, consultation, facilitation, long-term and on-call staffing support and a wide range of CBRNE response training exercises.

All training is customized to meet your specific objectives. The IIF Team has extensive experience and expertise in the many facets of domestic operations. Our Team is exceptionally well versed in joint interagency, military and civilian crisis and emergency doctrine and operations. This includes planning, training, organization, staffing and procedures that continuously improve emergency management preparation. Our team has experience with military and civilian agencies at all levels.

Support services we offer include:

- Teach a myriad of FEMA Emergency Management Institute, CBRNE and WMD courses. Includes core curriculum and instruction.
- Teach other courses in:
 - Incident and Emergency Management.
 - Continuity of Operations.
- Review and promulgation of plans, policies and programs.
- CBRNE consultation in conjunction with training and exercise support services.
- Support based on corporate understanding of All-hazards incidents, Pre and Post-Event management.
- Plan and execute Table-Top, small or large scale CBRN Response Enterprise (CRE) training exercises. Includes support of full-spectrum exercise development and execution.
- IIF can provide national, state, and local exercise development, facilitation and execution.

Please contact IIF and allow us to help you to meet the many requirements associated with your mission.

Best regards,

Xavier Stewart, F.ACFE, PhD, RPO, RAD III, CHS-V
